MARK: anabiology (Standard Characters, mark.jpg)  
The literal element of the mark consists of anabiology.  
The mark consists of standard characters, without claim to any particular font, style, size, or color.

We have received your application and assigned serial number '85469080' to your submission. The summary of the application data, *bottom below*, serves as your official filing receipt.

In approximately 3 months, an assigned examining attorney will review your application to determine if all legal requirements are met. Currently, your mark is not registered and is considered a "pending" application. The overall process from the time of initial filing to registration or final refusal can take 13-18 months or even longer, depending on many factors; e.g., the correctness of the original filing and the type of application filed. It is CRITICAL that you check the status of your application at least every 3 - 4 months and promptly contact the Office if a letter (an "Office action") or notice has issued for your application that you did not receive or do not understand. To check the status, please use <http://tarr.uspto.gov>. Do not submit status requests to [TEAS@uspto.gov](mailto:TEAS@uspto.gov). Failure to respond timely to any Office action or notice may result in the abandonment of your application, requiring you to pay an additional fee to have your application revived even if you did not receive the Office action or notice.

Please view all incoming and outgoing correspondence at <http://portal.uspto.gov/external/portal/tow>. If your status check reveals an issued Office action or notice that you did not receive, immediately view the action/notice through the USPTO website. The USPTO does not extend filing deadlines due to a failure to receive USPTO mailings/e-mailings. You must ensure that you update your record if your mail and/or e-mail address changes, using the form available at <http://www.uspto.gov/teas/eTEASpageE.htm>.

If you discover an error in the application data, you may file a Voluntary Amendment, at <http://www.uspto.gov/trademarks/teas/miscellaneous.jsp>. Do not submit any proposed amendment to [TEAS@uspto.gov](mailto:TEAS@uspto.gov), because the technical support team may not make any data changes. NOTE: You must wait approximately 7-10 days to

submit any Voluntary Amendment, to permit initial upload of your serial number into the USPTO database. The acceptability of any Voluntary Amendment will only be determined once regular examination begins, since the assigned examining attorney must decide whether the change proposed in the amendment is permissible. Not all errors may be corrected; e.g., if you submitted the wrong mark, if the proposed correction would be considered a material alteration to your original filing, it will not be accepted, and your only recourse would be to file a new application (with no refund for your original filing).

Since your application filing has already been assigned a serial number, please do not contact [TEAS@uspto.gov](mailto:TEAS@uspto.gov) to request cancellation. The USPTO will only cancel the filing and refund your fee if upon review we determine that the application did not meet minimum filing requirements. The fee is a processing fee that the USPTO does not refund, even if your mark does not proceed to registration. NOTE: The only "exception" to the above is if you inadvertently file duplicate applications specifically because of a *technical glitch* and not merely a misunderstanding or mistake; i.e., if you believe that the first filing did not go through because no confirmation was received and then immediately file again, only to discover later that both filings were successful, then the technical support team at [TEAS@uspto.gov](mailto:TEAS@uspto.gov) can mis-assign and refund one of the filings.

WARNING: You may receive unsolicited communications from companies requesting fees for trademark related services, such as monitoring and document filing. Although solicitations from these companies frequently display customer-specific information, including USPTO serial number or registration number and owner name, companies who offer these services are not affiliated or associated with the USPTO or any other federal agency. The USPTO does not provide trademark monitoring or any similar services. For general information on filing and maintenance requirements for trademark applications and registrations, including fees required by law, please consult the USPTO website.

Previous application then abandoned: May 18, 2005 Re: Serial No: 78/444258 Trademark Application for: The International Academy Of Anabiology Examining Attorney: Mrs. W. K. H. Price, Esq, Law Office 111 Definition of "anabiosis:" 1. anabiosis a return to life after apparent death; a state of suspended animation induced in an organism by, e.g., desiccation or freezing, and reversed by rehydration or warming. (From Oxford Dictionary of Biochemistry and Molecular Biology in Biological Sciences) Early research on the original living organism: Water Bears Phylum: Tardigrada Over 800 species in 2 classes and 15 families. Distribution

Worldwide, particularly on damp moss, also in soil, freshwater, and marine sediments. Fossil record: species from the Cretaceous period, 136 million years ago. My personal early use of this word: I know I used the words, "anabiosis" and "anabiology" on at least one of my many web sites ([www.karlloren.com](http://www.karlloren.com)). Eventually I decided to pursue my interest and created a new web site, [www.academyofanabiology.com](http://www.academyofanabiology.com), which was published with a published claim of origin of June 30, 2004. I created content for that site, revolving around my use of my understanding of my own-created LAWS of Anabiology in the process of researching how to heal my wife (Bonnie J. Troescher) of Esophagus Cancer -- as an alternative to the traditional chemotherapy and radiation she accepted also. In keeping with my understanding of those same LAWS of Anabiology, I selected several non-medical protocols, created some as my original works of this science. Eventually my wife rejected further chemo and radiation therapy and pursued my "Anabiology alternatives." In due course she was pronounced "cured" of this cancer by two Medical Doctors at UCLA Hospital. Encyclopaedia Britannica returns no results for search for "anabiology." Sorry, we were unable to find an exact match for anabiology. Here are results using alternate spellings and phrases. You may also try rephrasing
